

## Advancing into Analytics Foundations: Demo notes

Is there a difference in sales between legacy and prototype stores?

1. Make a copy of the workbook. We want to keep the raw data intact for the next lessons.
2. Create a PivotTable containing *trans\_id* in the rows, *airco* in the Columns and *Sum of sales\_amt* in the Values.
  - a. Design > Grand Totals > Off for Rows and Columns
3. Download the Data Analysis ToolPak:
  - a. File > Options > Add-ins > Go > Analysis ToolPak
4. Run the descriptives for each category using the Analysis ToolPak:
  - a. Data > Data Analysis > Descriptive Statistics
  - b. Select the data range, making sure you check on “Labels in first row”
  - c. Specify that you want summary statistics and select the output range.

5. It appears the prototype stores are pulling in a \$20 increase over legacy. But is this likely to hold up across all stores?

legacy		prototype	
Mean	63.26348565	Mean	83.98636719
Standard Error	1.184356777	Standard Error	2.505184452
Median	58.5	Median	79.75
Mode	60	Mode	85
Standard Deviation	24.21423152	Standard Deviation	28.34292663
Sample Variance	586.3290081	Sample Variance	803.32149
Kurtosis	1.859237628	Kurtosis	2.008098809
Skewness	1.233579448	Skewness	1.224126139
Range	150	Range	158.1
Minimum	25	Minimum	31.9
Maximum	175	Maximum	190
Sum	26444.137	Sum	10750.255
Count	418	Count	128

We'll check one more thing before answering: let's visualize the data.

### Plot a histogram for two categories

1. Create another PivotTable (copy-paste the old one)
2. Place the two categories along the Columns, the continuous variable of interest down the Rows, and the Count of the ID variable in the Values.

- Right-click the Rows area and select Group.

The screenshot shows the Microsoft Excel interface with a PivotTable and its field list. A right-click context menu is open over the Rows area of the PivotTable, with 'Group...' selected. The PivotTable shows summary statistics for 'sales\_amt' grouped by 'store\_type'. The field list on the right shows 'trans\_id', 'sales\_amt', and 'store\_type' are added to the report.

	K	L	M	N
Skewness	579448	1.224126		
Range	150	158.1		
Minimum	25	31.9		
Maximum	175	190		
Sum	44.137	10750.26		
Count	418	128		

**PivotTable Field List:**

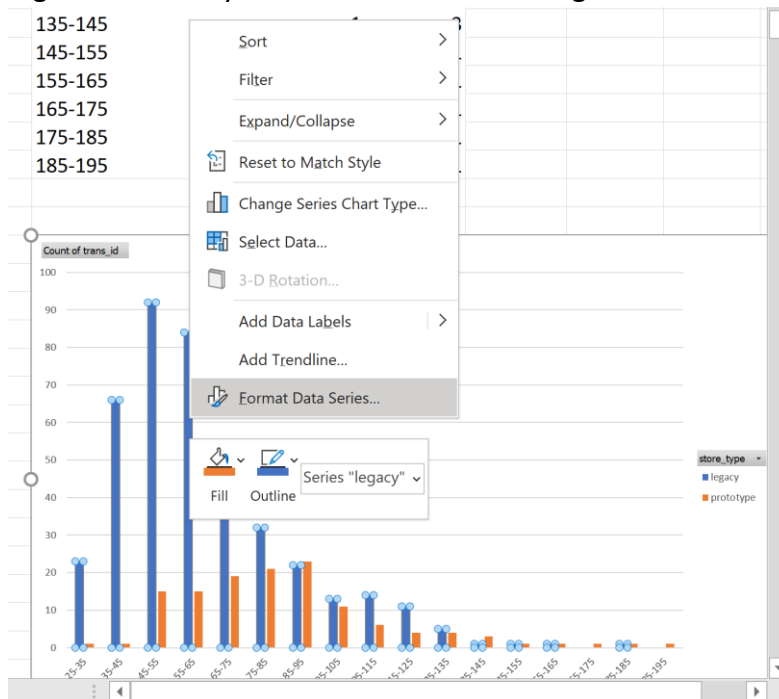

- Choose fields to add to report:
  - ☒ trans\_id
  - ☒ sales\_amt
  - ☒ store\_type
- Drag fields between areas below:
  - Filters:**
  - Columns:** store\_type
  - Rows:** sales\_amt
  - Values:** Count of...

- Go to Insert on the home ribbon and select a 2-D Column chart.

5. Right-click on any of the bars in the resulting bar chart. Select Format Data Series.

6. Adjust the Series Overlap to 100% and the Gap Width to 0%.
